

Consolidated Copper Corporation is a mining, development, and exploration company, focusing on copper mining in Namibia. The company is seeking to employ suitably qualified candidates for the following temporary positions at the Northern Operations – Tschudi Mine, Tsumeb

TEMP EXPLORATION GEOLOGIST– TECH06 x 1

Role Purpose: Reporting to the Technical Services Manager, the Exploration Geologist will play a crucial part in the exploration drilling planning and supervision. The candidate will also play a vital role in the provision and analysis of the grade control and resource drilling, and mine mapping data to be used in geological modeling, with the aim of providing accurate data to aid Mineral Resource Estimate (MRE).

Educational and Experience Requirements

- A relevant Bachelor's Degree in Geology NQF 7-8
- 2-5 years' proven experience as a Geologist in a base metal mining environment.
- Computer literacy in MS Office, geological software experience i.e Surpac, Grade Runner, Minesight, Datamine and GIS
- Database management, modelling skills, grade control
- Drilling and sampling experience

Skills and knowledge

- Good scientific and technical skills, report writing, good observation skills; strong spoken and written communication skills
- Mineralization controls and ore shoot distribution
- Diamond and RC drilling techniques and geological data analysis
- Health, safety, and environmental regulations
- JORC/SAMREC standards for reserve and resource reporting
- Industry literature on drilling and rock-consolidation methods
- Computer literacy in MS Office and GIS applications and database management
- Strong analytical and problem-solving skills
- Core and RC logging and assay interval determination
- Interpretation of geological plans and 3D model

Key Responsibilities

- Prepares and present detailed annual drilling plans and budgets to senior management for approval, ensuring cost-effectiveness and alignment with mine objectives.
- Analyses controls of mineralization, interpreting the distribution and continuity of ore body/shoots across and along plunge directions to define target areas for drilling.
- Compiles the Exploration and Ore Reserves sections of the annual Life of Mine Report and present to the Technical Services Manager for approval
- Logs and scrutinizes drill core daily, identifying rock types, mineralization, and faults, and record findings in rough core logs to determine assay sampling intervals.
- Develops, implements, and enforces safe work procedures for drilling, core handling, and site inspections
- Validates the data and updates the database with no errors
- Ensures drilling operations adhere to environmental regulations set by the Ministry of Mines and Energy and OML policies/procedures.
- Provides mentorship, technical guidance, and on-the-job training to Junior Geologists and Technical Services Operators to build departmental expertise and ensure continuity of geological knowledge.

Candidates must be Namibian citizens or holders of Namibian permanent residence permits and should hold a valid Code B (08) driver's license.

If you meet the requirements for this role and are ready to contribute to the success of our company, please apply through our recruitment portal at www.jobopportunities.net.

CLOSING DATE FOR APPLICATIONS IS 10 July 2026.

Ongopolo Mining Limited is an equal opportunity employer. Women and persons with disabilities are encouraged to apply.
